**WE HAVE NO BRANCH**

From its very inception in 1953, the guiding philosophy at **Agrawal Classes** has been to admit academically brilliant students and then guide them through a most effective coaching programme so that they achieve the highest scores at the exams. All these years our students have been securing topmost ranks, be it the Inter/First Year Maths of Bombay University, the I.I.T. JEE, the HSC Board or the MHT-CET. This has been possible because of our ability to keep up with the changing trends in the education system and adapt ourselves to the needs of students.

### H.S.C. XII and MHT-CET

Till 1998, admissions to engineering and medical colleges in Maharashtra were based on marks secured at the HSC. From 1999 to 2004, medical college admissions were through Common Entrance Test (CET) while engineering admissions were on the basis of HSC scores. From 2005, admissions to engineering, medical and pharmacy colleges are based on merit positions at the MHT-CET, with a minimum of 50% marks in HSC.

### Our Coaching Programme for MHT-CET

From the time, we started coaching for CET, we observed that a **thorough understanding and mastering of the HSC subjects is a must** before one can apply that knowledge for performing well at CET. Doing well in HSC also safeguards a student against uncertain admission policies decided by various governments. And the training our students receive for CET, not only does it help them at the state CET, but also at Maharashtra Private College CETs and other national exams like AIEEE, AIIMS, AFMC etc.

### Other Entrance Exams

Parents and students are often confused about various competitive exams they should prepare for.

The following guidelines will help you in this.

- Before you plan your preparation, please try to gather accurate current information on the exams that you wish to appear and compare their syllabus with the HSC syllabus.
- Collect data from Colleges (visit their websites), talk to past students, your own professors etc.
- Find out the rate of success, rank-branch-college combination etc.
- At the all India exams, out of lakhs who appear from all over India, only a few are successful in the whole of

Maharashtra, because of vast difference with the HSC syllabus.

- Even in exams like AIEEE ([www.aieee.nic.in](http://www.aieee.nic.in)), only a handful of Mumbai students join their preferred Colleges, like NITs (former RECs).
- Also keep in mind that amongst those succeeding at these entrance tests, many are repeaters i.e. they get through only in 2nd attempt.
- Do not give too many Entrance exams. Choose one or two major ones and focus your preparation accordingly. And remember, **do not** neglect your Board Exams.
- Come to a realistic estimation of your own chances of success at those admission tests.

From our long experience in this field we have seen that if a student is focused and concentrates on the HSC and CET seriously, he stands a better chance in getting a seat at a reputed professional college for a branch of his choice, than the one who tries to appear at several entrance tests like I.I.T. JEE, AIEEE, AIIMS, AFMC etc.

And we have been proved to be the best coaching institution for CET.

### Our Course for MHT-CET : 2010

### Note :

- (i) Course duration and timings are subject to change as per schedule of colleges and the requirement of the course with respect to syllabus.
- (ii) As our coaching programme is devised on the basis of schedule of majority of Mumbai Colleges, there is absolutely no scope for any flexibility to students of Jr. colleges attached to local High Schools.

### Compulsory Tests and Revision Lectures

Answering very quickly and correctly within the allotted time is a major challenge for success in CET. To thoroughly master this skill we have planned for over 150 hours of test answering. These tests will initially be held individual chapter wise, then few chapters together, and later (in April-May 2010) about 15 prelim tests in each subject, covering the entire syllabus exactly on lines of actual MHT-CET.

Our marking of the answer sheets is done exactly on the lines of final CET. Therefore, each test result will enable you to assess your progress and help in planning your preparation accordingly. As all our students are academically gifted and come from over 50 colleges, the relative ranking at our tests is a good indicator of your performance amongst the top 10% of Mumbai student population.

Solution to few questions and answer papers for all the tests will be distributed on the same day, just after the test. This will be useful to students to check the answers and correct their mistakes at home. This system continues till the final examination.

**Attendance in all the Tests is compulsory.** Absentee students will not get question/solution/answer papers; nor will a re-exam be held for them. Revision lectures in all subjects will be held from time-to-time in April-May, 2010. Only those students who are regular in attending tests will be given the benefit of these lectures.

All CET tests in March-April-May 2010 will be scheduled either in the morning or in the evening. Test schedule will be notified well in advance. The venue for all tests will be **Raja Shivaji Vidhyalaya** (King George School), Near Ruia College, Hindu Colony, Dadar T.T.

### Merit Prizes

Though all our students make us proud of their achievements, we feel our toppers deserve special appreciation. At our Annual Prize Distribution function, we honour them and award cash prizes and/or silver/gold medals.

A list of our toppers at MHT-CET 2008 is printed in the following pages.

Also a list of our Top Scorers at 2009 is given separately.

### Alumni

It gives us a feeling of immense satisfaction to see our students getting selected to the most prestigious institutions, both in India and abroad. Many of them occupy enviable positions in all walks of life. Occasionally we interact with some of them. They still cherish the short but academically fruitful time they spent with us and they have high praise for our professors who have become legends within the student community. We would always love to interact with them and share their views and suggestions.
